## **New Drive-Up Topper Series** *Compatible With The Latest Generation Of Island ATM Models*

**May 11, 2010, NORTH SALT LAKE, UT** – Companion Systems, a leading provider of ATM surround, kiosk and enclosure solutions, introduced a new drive-up topper series to fit the latest generation of island ATMs.

Companion Systems 3838 and 3839 island identifiers were designed by their engineering department to complement the latest ATM models. The newly designed island toppers are a simple and cost-effective way to brand a drive-up, island ATM. The toppers come with backlit front signage and a secure storage area. Optional side signs are also available.

“We are pleased with our latest island topper design,” said John Hansen, COO of Companion Systems. “Our engineering department works closely with the major ATM manufacturers to make sure our signage products highlight their newest ATM models. This gives us the opportunity to have product available when customers start to purchase newer ATMs.”

### *About Companion Systems*

Companion Systems has been the leading provider of ATM surround, kiosk, enclosure and signage solutions for the financial services industry since 1980. For the last four years, Companion Systems has been certified as a Women's Business Enterprise by the Women's Business Enterprise National Council (WBENC). Companion Systems six-acre campus consists of seven buildings and over 100,000 square feet of design and manufacturing facilities located in North Salt Lake, Utah.
