

PROFILE IN SUCCESS : PARK CITY MOUNTAIN RESORT

In November 2001, Companion Systems supplied a series of through the wall ticketing kiosks to Park City Mountain Resort, one of several ski areas in Utah that was a host venue for events of the 2002 Winter Olympic Games.

The project and the ticketing kiosk products were featured in national media like Kiosk Magazine, as well as local media, and on Skinet.com, an online community for resort news.

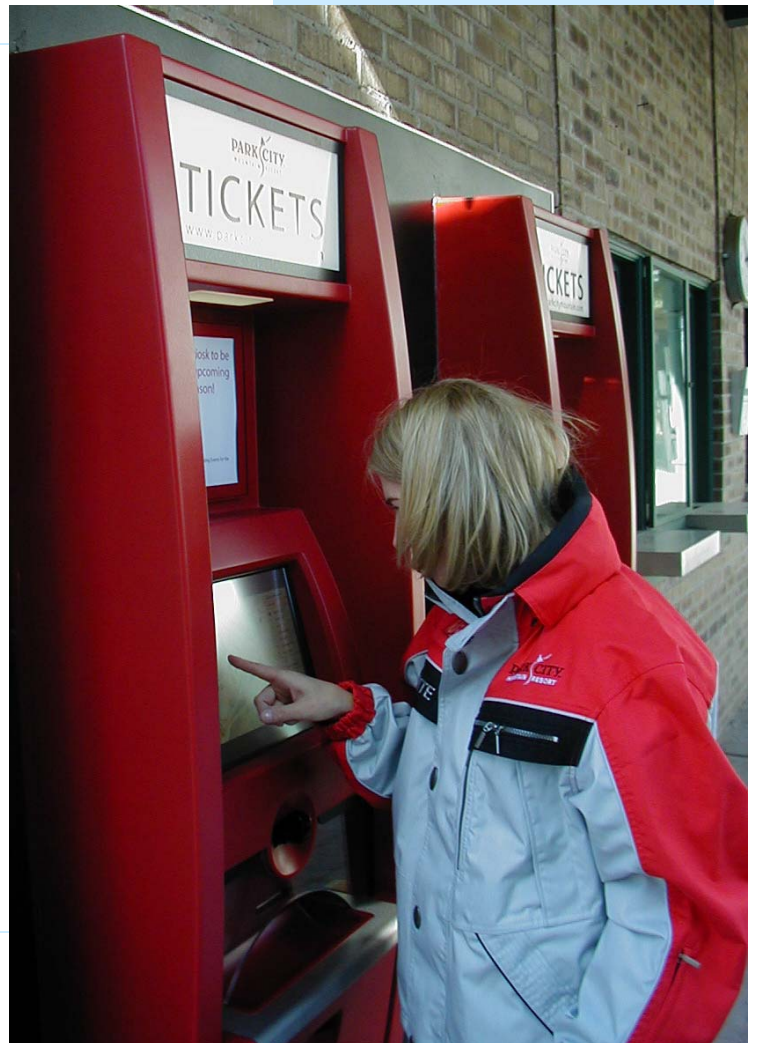

“The ticketing kiosks that we recently installed are a complete success!

The first day that we were open the kiosks actually sold more than the ticket windows, the second day we didn't even open a ticket window. People are comfortable using the units to purchase lift access tickets and they seem to be relatively maintenance free.

We have arranged for volunteer mountain hosts to direct people to the kiosks and assist when necessary.

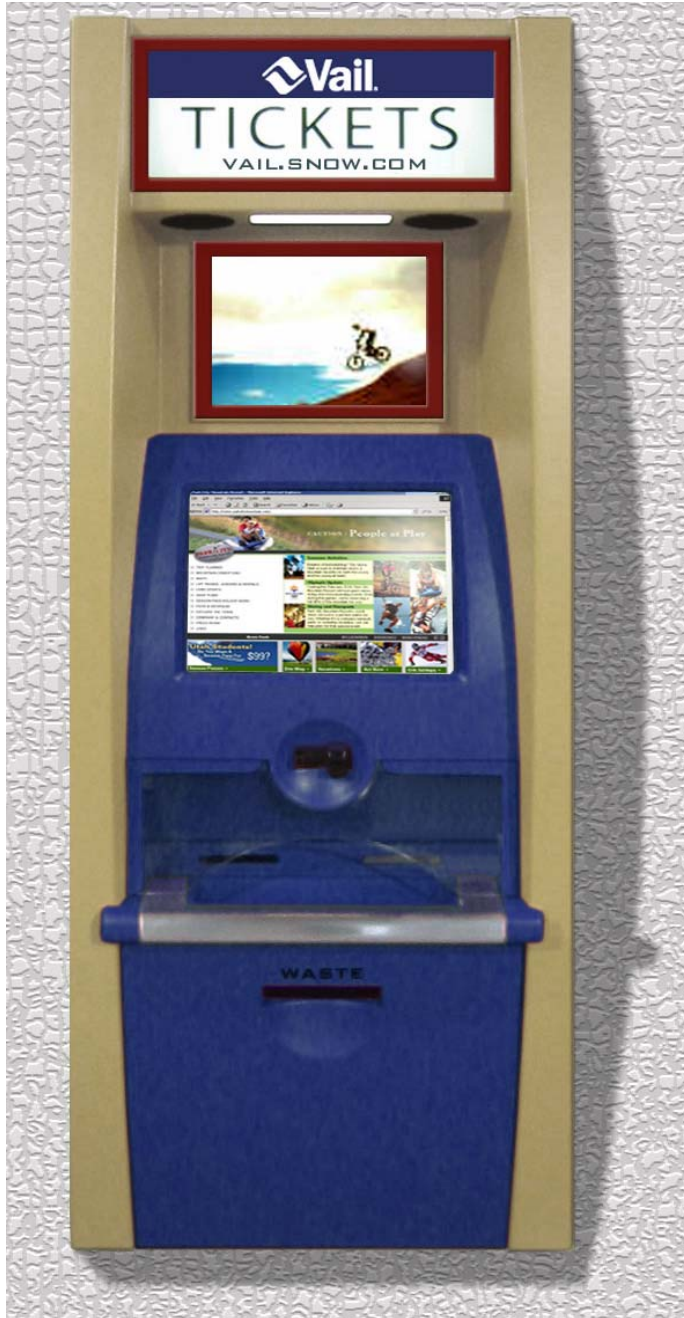

We look forward to expanding our kiosk implementation.. Thanks for your hard work and for meeting our timeline when we needed it the most.”

- Kyle Lamalfa
